My unit orientation was great. I felt very supported. The onboarding orientation off the unit felt like information I already knew since I was already a TCH employee. I felt as though the transfer/onboarding orientation class could have been shorter.

Our nursing educator left during the middle of my orientation, so it made it quite difficult to follow up on what paperwork needed to be completed. not sure if there is a system in place to ensure the new nursing educator is up to date on the new hires and their orientation.

Transitioning from a staff nurse to a PCM in the outpatient area was difficult because there was no plan devised to ensure I was successful. I received what training I did get from my Director who was very busy with her own job duties and therefore didn't have the time to devote to my orientation process.
